

Determination Advice Notes:

1. With reference to Condition 5.2 the portion of the existing footpath traversing the proposed crossover must be retained. The proposed crossover levels shall match into the existing footpath levels. Should the footpath not be deemed to be in satisfactory condition, it must be replaced with in-situ concrete panels in accordance with the City's specification for reinstatement of concrete paths.
2. With reference to Condition 5.3 all new crossovers to the development site are subject to a separate application to be approved by the City.
3. A security bond for the sum of \$3,500 shall be lodged with the City by the applicant, prior to the issue of a building permit. This bond will be held until all building/development works have been completed and any disturbance of, or damage to the City's infrastructure in the Right of Way and the Verge along Bulwer Street, including verge trees, has been repaired/reinstated to the satisfaction of the City. An application for the refund of the security bond shall be made in writing. The bond is non-transferable.
4. The movement of all path users, with or without disabilities, within the road reserve, shall not be impeded in any way during the course of the building works. This area shall be maintained in a safe and trafficable condition and a continuous path of travel (minimum width 1.5 metres) shall be maintained for all users at all times during construction works. If the safety of the path is compromised resulting from either construction damage or as a result of a temporary obstruction appropriate warning signs (in accordance with AS1742.3) shall be erected. Should a continuous path not be able to be maintained, an 'approved' temporary pedestrian facility suitable for all path users shall be put in place. If there is a request to erect scaffolding, site fencing etc. or if building materials are required to be stored within the road reserve, once a formal request has been received, the matter will be assessed by the City and if considered appropriate a permit shall be issued by the City. No permit will be issued if the proposed encroachment into the road reserve is deemed to be inappropriate.
5. With reference to Condition 3, no further consideration shall be given to the disposal of stormwater 'offsite' without the submission of a geotechnical report from a qualified consultant. Should approval to dispose of stormwater 'offsite' be subsequently provided, detailed design drainage plans and associated calculations for the proposed stormwater disposal shall be lodged together with the building permit application working drawings.
6. Any additional property numbering to the abovementioned address which results from this application will be allocated by the City of Vincent. The applicant is requested to liaise with the City in this regard during the building permit process.
7. With reference to Condition 5.4, at any point where the lot is proposed to be subdivided the area identified for manoeuvring is required to be shown as common property or an easement provided. This should form part of the strata by-laws, should they be applicable.
